

Lift solutions, locally supported.

Supply • Installation • Repair • Servicing • Maintenance

VALUE. INNOVATION. PRESTIGE.

International systems. Nigerian expertise.

VIP Lift Nigeria supplies, installs, repairs, services and maintains selected international lift systems for homes, businesses and public buildings.

- Early-stage site and requirement review
- Product selection and supply coordination
- Professional installation and commissioning
- Responsive servicing, repairs and maintenance

Support across the lift lifecycle.

01

Supply

Selected systems matched to the building, users and design intent.

02

Installation

Coordinated delivery, installation and commissioning support.

03

Repair

Practical fault response and repair planning.

04

Servicing

Routine attention that protects performance and usability.

05

Maintenance

Structured ongoing support for long-term confidence.

One accountable local partner from first conversation through ongoing care.

A solution for the building and the journey.

01

Platform lifts

Accessible, space-aware solutions for homes and public environments.

02

Traction lifts

Efficient vertical mobility for multi-storey residential and commercial use.

03

Home lifts

Comfort, accessibility and future-ready living integrated into the architecture.

04

Commercial lifts

Durable passenger movement for offices, hotels, retail and public buildings.

WHERE WE WORK

Designed for everyday Nigerian buildings.

Private homes

Duplexes

Apartments

Hotels

Offices

Shopping environments

Churches

Public buildings

Each project begins with the site, the intended users and the maintenance reality.

From requirement to reliable operation.

01

Review

Understand the building, users, access requirements and commercial priorities.

02

Recommend

Shape a clear lift brief and suitable system direction.

03

Coordinate

Align supply, site preparation, installation and commissioning.

04

Support

Provide servicing, maintenance and repair response after handover.

Clear advice. Precise coordination. Ongoing local support.

The relationship continues after installation.

01

Planned maintenance

Scheduled checks and practical maintenance planning.

02

Responsive servicing

Clear communication when performance needs attention.

03

Repair coordination

Diagnosis, parts planning and repair execution.

04

Lifecycle guidance

Support for responsible operation and future decisions.

Let's review your building.

Share the site, intended use and project stage. We will help shape the next practical step.
