

Brand Guidelines

A premium Nigerian lift-solutions identity shaped by architectural clarity and European engineering discipline.

VALUE. INNOVATION. PRESTIGE.

Built to elevate confidence.

VIP Lift Nigeria is a Nigerian lift-solutions partner that supplies, installs, repairs, services, and maintains selected international lift systems for homes, businesses, and public buildings.

01

Premium

Refined choices, confident restraint and excellent finish.

02

Engineering-led

Clear specifications, precise language and practical expertise.

03

Locally supported

Service, maintenance and responsive support for Nigerian buildings.

04

Architectural

A visual system that complements spaces rather than competing with them.

Homes • Duplexes • Apartments • Hotels • Offices • Public buildings

Calm expertise. Clear service.

POSITIONING

International lift systems,
selected for Nigerian buildings
and supported locally.

Clear

Use direct language and explain technical details without jargon.

Confident

State capability precisely; avoid hype and unsupported superiority claims.

Service-oriented

Lead with outcomes, maintenance support and practical next steps.

Premium

Sound assured and considered, never loud, ornamental or arrogant.

Preferred service line

Lift supply, installation, repair, servicing and maintenance.

One identity, several useful lockups.

- Use the stacked lockup for covers, premium presentations and formal brand moments.
- Use a no-slogan horizontal lockup when the slogan would reproduce too small.
- Use symbol-only artwork for profile icons, patterns and restrained supporting marks.
- Never type, trace or reconstruct the custom VIP LIFT wordmark.

Give the mark room to work.

Clear space: at least the height of the symbol stem (X) on every side.

DIGITAL

Minimum digital size

With slogan: 240 px wide
Without slogan: 140 px wide
Symbol only: 32 px square

PRINT

Minimum print size

With slogan: 48 mm wide
Without slogan: 28 mm wide
Symbol only: 8 mm square

When in doubt, use a simpler lockup rather than reducing the slogan below legibility.

Protect recognition and credibility.

× Do not stretch or compress

× Do not rotate

× Do not recolour

× Do not add shadows

× Do not outline

× Do not use on busy imagery

× Do not recreate the wordmark

× Do not use low-resolution files

Dark depth. Precise light. Restrained green.

Emerald is an accent, not a field colour. Navy and white carry the system.

Elegant headings. Uncomplicated reading.

Cormorant Garamond

Display serif for cover titles, major headings and premium editorial moments.

Inter

Primary sans-serif for documents, specifications, tables, digital interfaces and body copy.

MONTSERRAT

Geometric accent for short uppercase labels, navigation and technical details.

The wordmark is supplied artwork.
It is never recreated with a font.

Fallbacks when brand fonts are unavailable: Baskerville, Avenir Next and Arial.

Identity-derived, never decorative noise.

↓

Diagonal elevation

Upward movement for campaign and social applications.

Architectural shaft

Technical linework for quotations, profiles and specifications.

09 / 16

Architecture first. People only with purpose.

Preferred image qualities

- Modern Nigerian residential, hospitality and commercial architecture.
- Realistic lift integration, honest materials and clean vertical geometry.
- Controlled lighting, neutral surfaces and restrained emerald moments.
- Negative space that allows official typography and logos to remain clear.

Avoid: synthetic text, invented control panels, fake brand marks, exaggerated chrome and visibly impossible interiors.

A coherent system across every touchpoint.

01

Business card

Dark and light, front and back

02

Letterhead

A4 editable Word template

03

Quotation

Six-page commercial proposal

04

Company profile

Eight-page presentation

05

Email signature

Compact HTML-friendly design

06

Social

Square service graphic and profile icon

07

Cabin plate

Durable, high-contrast signage

08

Patterns

Vector and raster background system

Templates use consistent sample details registered under the reserved .example domain. Replace before publication.

Recognizable at a glance.

Profile icon

- Keep mobile headlines below 12 words.
- Use no-slogan logos when the lockup is small.
- Keep calls to action direct: Request a site review.
- Use emerald for actions and service emphasis, not full backgrounds.

Quiet precision reproduces as premium.

Paper

Uncoated premium white or warm-white stock. Avoid highly glossy paper for corporate documents.

Colour

Use CMYK builds as production starting points and approve proofs before long runs.

Finishing

Blind deboss, restrained silver foil or spot varnish may be used selectively.

Signage

Prioritize contrast, durability and legibility over decorative surface effects.

Bleed

Business cards and full-bleed print pieces use 3 mm bleed with a 5 mm safe area.

Logo

Prefer supplied SVG or PDF artwork for print. Do not upscale low-resolution PNGs.

Choose the right file for the job.

VECTOR

SVG

Preferred for scalable logos, patterns and digital production.

PRINT

PDF

Print-ready guides, proposals, profiles and shareable masters.

DIGITAL

PNG

Transparent logos and sharp digital graphics.

PHOTO

JPG

High-quality photographic previews where transparency is unnecessary.

EDIT

PPTX

Editable presentation and designed layout masters.

EDIT

DOCX

Editable operational documents and client proposals.

For production print, confirm bleed, colour profile, stock and finishing with the selected vendor.

Organized for real-world use.

01-Logo

Official supplied marks in PNG, SVG and PDF.

02-Colours

Five-page colour guide and page exports.

03-Typography

Six-page type guide and editable master.

04-Brand-Patterns

Three identity-derived pattern families.

05-Templates

Business, document, profile, email, social and signage masters.

06-Exported-Assets

Consolidated PDF, PNG, JPG and SVG delivery folders.

README.md and brand-kit-manifest.json describe the delivered package and are maintained as the index of record.

Approval & stewardship

Use official artwork. Protect clear space. Keep copy precise. Verify technical and commercial claims before publication.
